Subject: PRIA Label Amendment – Adding new alternate formulation e0152-076, also adding SAR-CoV-2 and Feline Calicivirus  
Product Name: Brace  
EPA Registration Number: 777-99  
Application Date: 03/12/2021  
Case Number: 294876

Dear Ms. Landolt:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Also, the following Alternate Brand Names have been approved for this product:

- Disinfectant Spray Tangerine & Pear Scent Lysol Brand Kills 99.9% of Viruses & Bacteria\*\*
- Lysol Brand Kills 99.9% of Viruses & Bacteria\*\* Disinfectant Spray Tangerine & Pear Scent

Please note that the record for this product currently contains the following CSF:

- Alternate CSF 58 (e0152-076) dated 2/4/2022.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Stacey Grigsby by phone at 703.305.6440, or via email at [grigsby.stacey@epa.gov](mailto:grigsby.stacey@epa.gov)

Sincerely,

(§§) (This product) (meets) (is) (compliant with) OSHA Bloodborne Pathogens Standards§§

**Special Instructions for Cleaning and Disinfecting areas which may be infested with Hantavirus:**

Rodent droppings and visible dust may be reservoirs for Hantavirus. If you are cleaning out a building that has been closed up, such as a cabin, shed, or garage:

1. Air out the building for at least 30 minutes by opening windows and doors.
2. Leave the building while it is airing out.
3. Do not vacuum, sweep or dust. This may spread the Virus through the air.
4. Thoroughly wet the contaminated areas with the product and allow to stand undisturbed for 30 seconds.
5. Carefully remove contaminated material and dispose by burial or burning. Contact your local or state health department for additional disposal methods.
6. Treat the surface again following the label directions and allow to stand undisturbed for 30 seconds.

**Veterinary Practice / Kennels / Animal Care Facilities:** For disinfecting hard, non-porous surfaces including equipment, utensils, cages, kennels, instruments etc. Remove all animals and feeds from the premises, crates, cages, and enclosures. Remove all litter, droppings, and manure from floors, walls, and surfaces occupied or traversed by animals. Empty all troughs, racks and other feeding / watering appliances. Thoroughly clean surfaces with soap or detergent and rinse with water. Saturate surfaces and allow to stand 3 minutes. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, set, and dried. Thoroughly scrub all treated feed racks, automatic feeders, and watering appliances with soap or detergent, and rinse with potable water before use.

**<< PRECAUTIONARY / FIRST AID / STORAGE & DISPOSAL >>**

**PRECAUTIONARY STATEMENTS:** Hazards to Humans and Domestic Animals

**<< EMERGING VIRAL PATHOGENS CLAIMS – Hard, non-porous surface >>**

This product qualifies for emerging viral pathogen claims per the EPA’s ‘Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered Disinfectant Labels’ when used in accordance with the appropriate use directions indicated below.

This product meets the criteria to make claims against certain emerging viral pathogens from the following viral categories:  
 -Enveloped Viruses  
 -Large Non-Enveloped Viruses  
 -Small, non-enveloped virus

<b>For an emerging viral pathogen that is a/an...</b>	<b>...following the directions for use for the following organisms on the label:</b>
Enveloped virus	Rotavirus WA Rhinovirus Type 39 Feline Calicivirus (Norovirus)
Large, non-enveloped virus	Rhinovirus Type 39 Feline Calicivirus (Norovirus)
Small, non-enveloped virus	Poliovirus Feline Calicivirus (Norovirus)

{Product name} has demonstrated effectiveness against viruses similar to [name of emerging virus] on hard non-porous surfaces. Therefore, {product name} can be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es)] on hard, non-porous surfaces. Refer to the [CDC or OIE] website at [pathogen-specific website address] for additional information.

[Name of illness / outbreak] is caused by [name of emerging virus]. {Product name} kills similar viruses and therefore can be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es)] on hard non-porous surfaces. Refer to the [CDC or OIE] website at [website address] for additional information.
